

BICYCLE LANE

A Bicycle lane designates a portion of the roadway for exclusive bicycle use through a dedicated lane, markings and signage. Bicycle lanes are typically located between the curb and travel lane or between a parking lane and a travel lane. Bicycle lanes are the preferred facility for most bicyclists.

SHARED ROADWAY

A shared roadway accommodates both vehicular and bicycle traffic by sharing a travel lane. These lanes may include "Share the Roadway" signage, "Sharrow" pavement markings, or both. Sharrows operate on the principle that bicycles are already allowed on most streets. A sharrow symbol and/or sign simply act as a reminder to the driver that bicyclists may be encountered in the roadway. A sharrow is most often used on a roadway where bicycle traffic is desirable but lane width is insufficient for a full bike lane. Motorist must maneuver around bicyclists without crossing the center line. Shared roadways are the most common type of bicycle facility in use today.
